This is UNEVALUATED Information			

25X1

1. After the transfer of Soviet Fuel Depot [ ] from Velten to Radensleben, which terminated on 12 September, all shipments including those to the army units are being handled by Depot [ ] in Velten. 1

The Soviet fuel depot in Radensleben is being enlarged on a large scale. During this enlargement period, no shipments will allegedly be handled there. 2

25X1

1 - 30	2 T	military goods, 36 tons	Welzow, Brand
	1 T	", 11 tons	Ribnitz-Damgarten
	1 T	", 12 tons	Parchim
	1 T	", 18 tons	Klausa

 Comment. The supply traffic at the Velten depot in September confirms the following observations:

25X1

The volume of incoming shipments amounted to 48 carloads and is still low. The volume of outgoing shipments in June, July and August was low. In September, it amounted to 240 carloads and exceeded the monthly average of 226 carloads for both depots in the first six months of 1954. About one third of these shipments is consigned to the depot of the Third Shock Army in Magdeburg, probably for the fall maneuvers.

 Comment. The enlargement of Radensleben depot is reported for the first time. The depot which has a capacity of about 5,000 cubic meters, was built in 1951.
